

TX-SERIES CO-ROTATING TWIN-SCREW EXTRUDER

Technical information

- Fully intermeshing, co-rotating twin-screw extruder
- Nominal barrel bore diameters from 32 mm to 120 mm
- Production capacities varying from 50 kg/h up to 4500 kg/h
- Fully automated PLC control system
- Power requirement ranging between 18 kW and 400 kW

Features

- Advanced PLC control system
- User-friendly intuitive operating system
- Low maintenance cost
- Recipe manager that ensures repeatable high-quality production
- High-quality products with reliable consistency
- Easy access to analyses of production statistics
- Built-in protection devices to safeguard extruder
- 24-hours local maintenance support
- Power dip recovery function
- IOT enabled

Applications

- Processing of maize, soya, wheat, legumes and other products
- Produces products for food, feed, aqua feed and pet food
- Ready-to-eat or precooked products
- Various shapes, sizes and diameters of extruded products
