

VACUUM CONVEYOR

Features

- Product is conveyed at a lower velocity to ensure softer handling
- Light-weight and hygienic design for easy cleaning
- Minimised segregation of mixed products
- Minimised wear of pipeline and bends
- Modular design to interconnect equipment
- Toolless cleaning and maintenance - hygienic design
- Energy efficient

Applications

- Can be used to transport a range of different dry bulk materials and products
- Gentle material handling, thereby limiting the segregation of material with different bulk-densities
- Conveying from several starting points to one receiver
- Enclosed (dust-free) conveying system to avoid any product loss or contamination
- Direct conveying into a receiver hopper with no product emissions

Technical information

- Made of mid-steel/304SS/316SS (Depending on application)
 - Reverse pulse jet for filter cleaning
 - Quick fit twist-and-fix cartridge filter
 - Lean or dense-phase conveying applications
 - Modular design for flexibility
- Product conveying throughput up to 1500 kg/hour
